

CONSENT CHECKLIST

FOR COVID-19 VACCINATION

If you choose to have a vaccine for yourself or your child, you should take this form to your appointment and ensure it is signed by both you and the clinician.

“**Informed consent**” means agreeing to something once you have been given the full information surrounding it. Informed consent is legally required in the UK *before* you undergo a medical procedure, such as COVID-19 vaccination.

Both patient/carer and clinician should tick the box for each statement they understand. See overleaf for verifications.

Statement	Patient	Clinician
1. Unlike traditional vaccines, the vaccines being used for COVID-19 (“the COVID-19 vaccines”) instruct the body cells to create the SARS-CoV-2 spike protein.	<input type="checkbox"/>	<input type="checkbox"/>
2. The COVID-19 vaccines may reduce severity of symptoms if the patient gets COVID-19, but may not prevent them from getting COVID-19 nor from passing it on.	<input type="checkbox"/>	<input type="checkbox"/>
3. Although alternative treatments are available, the COVID-19 vaccines have been granted Emergency Use Authorisation, so require less comprehensive clinical data.	<input type="checkbox"/>	<input type="checkbox"/>
4. By 8 Sep 2021, of the 48,344,566 people that had received at least one jab, there had been 1,645 deaths († 1 in 29,389 chance of dying from vaccine) and 1,196,813 adverse reactions <i>officially reported</i> . The <i>actual</i> figures may be ten times higher. Adverse reactions were reported more often in younger people than in older adults.	<input type="checkbox"/>	<input type="checkbox"/>
5. Adverse reactions to the COVID-19 vaccines include, but are not limited to: strokes, blindness, deafness, clotting, miscarriages, anaphylaxis and cardiovascular disorders.	<input type="checkbox"/>	<input type="checkbox"/>
6. We will not know what the possible long term effects of the COVID-19 vaccines may be (e.g., infertility) until after the studies of the clinical trials conclude in 2023. For this reason, the COVID-19 vaccines may be considered experimental.	<input type="checkbox"/>	<input type="checkbox"/>
7. The manufacturers of the COVID-19 vaccines are immune from civil liability.	<input type="checkbox"/>	<input type="checkbox"/>
8. As of 11 Jan 2021, the average age of death in the UK with COVID-19 was 83.	<input type="checkbox"/>	<input type="checkbox"/>
9. Crude mortality rates from 29 Jun 2020 to 12 May 2021 show under-30's <i>may</i> be more likely to die from taking a COVID-19 vaccine [†] than from dying with COVID-19: <ul style="list-style-type: none"> • Under fives: 1 in 500,000 chance of dying with COVID-19 • 5 to 9 years-old: 1 in 1,000,000 chance of dying with COVID-19 • 10 to 19 years-old: 1 in 166,667 chance of dying <i>with</i> COVID-19 • 20 to 29 years-old: 1 in 43,478 chance of dying with COVID-19 • 30 to 39 years-old: 1 in 12,500 chance of dying with COVID-19 • 40 to 49 years-old: 1 in 4,065 chance of dying with COVID-19 • 50 to 59 years-old: 1 in 1,399 chance of dying with COVID-19 • 60 to 69 years-old: 1 in 500 chance of dying with COVID-19 • 70 to 79 years-old: 1 in 189 chance of dying with COVID-19 • 80 years-old and above: 1 in 44 chance of dying with COVID-19 	<input type="checkbox"/>	<input type="checkbox"/>
10. The patient/carer does not feel coerced and is free to refuse a COVID-19 vaccine.	<input type="checkbox"/>	<input type="checkbox"/>

Patient/carer:

I accept each of the above statements, and hereby give my informed consent to receive an experimental COVID-19 vaccine, for which the long-term effects are unknown.

Patient name: _____

Signature: _____ Date: _____

Clinician:

I accept the above statements, and the patient/carer has given informed consent to receive a COVID-19 vaccine. I am not liable for any resulting adverse reactions.

Clinician name: _____

Signature: _____ Date: _____

Once signed by both parties, this form should be kept by the patient/carer.
