

“ Love learning and
finding what you love to do ”

At Park we will be at your child's
side every step of the way,
guiding them as their character develops
and as they make their own discoveries
about what they love.

Christopher Anders

more than

Dear Parent

Our ambition for your child is that the school guides them to find the things they will grow to love in life. Our new facilities are enjoyed by all our students, supporting their learning and enriching their time.

We have a wonderful new theatre, lecture hall, restaurant and activities on our playing field. Our restaurant serves affordable and delicious school meals prepared by our National award winning chefs and catering team. The classrooms include the latest large touch-screen technology. Students are cared for Year Teams, with competition coming through our four families.

Our school, which is set in a stunning park environment, inspires learning and encourages aspiration, helping our young people discover what they love. We have themed the areas of the school around parks of the world. As well as outdoor activity equipment, we have animals, and opportunities that other schools can only envy.

Enjoy our prospectus which I hope will give you a good idea of our vision, values, facilities, and the curriculum that your child will learn through at Park Community School.

Christopher Anders

more than
just a school

Curriculum

Curriculum

Our curriculum makes us different to other schools and ensures that children are well prepared for life after secondary school. We believe students need a range of experiences outside the classroom as well as excellent teaching inside; through a truly broad curriculum, including: enterprise experience in our industrial unit, horticulture on our small holding and construction in our skills centre, children will discover what they love to do. Most qualifications studied are GCSEs with alternative qualifications used where these best suit the young people. In order to prepare for the new more challenging GCSEs we use a variety of learning approaches to build knowledge, understanding and skills.

more than

more than

Curriculum

In years 9, 10 and 11 we maintain a broad curriculum with a modern language offered to all students as an option as well as traditional academic subjects such as history, geography and psychology. The school has a strong track record of success in performance subjects such as music, dance and drama as well as photography in the visual arts.

What makes us different is the addition of hands on subjects such as construction skills and horticulture. Also all students currently study towards and take GCSE RE and BTEC PE. So, we ensure no time is wasted and each student is as ready as possible for their next step in life.

more than

more than

English English
English ENGLISH

In English we open doors to real and imagined worlds by equipping our students with the skills and knowledge to become critical readers and creative accurate writers. We explore cultures from around the globe and across time to enhance students' understanding of the world and their place within it.

Curriculum

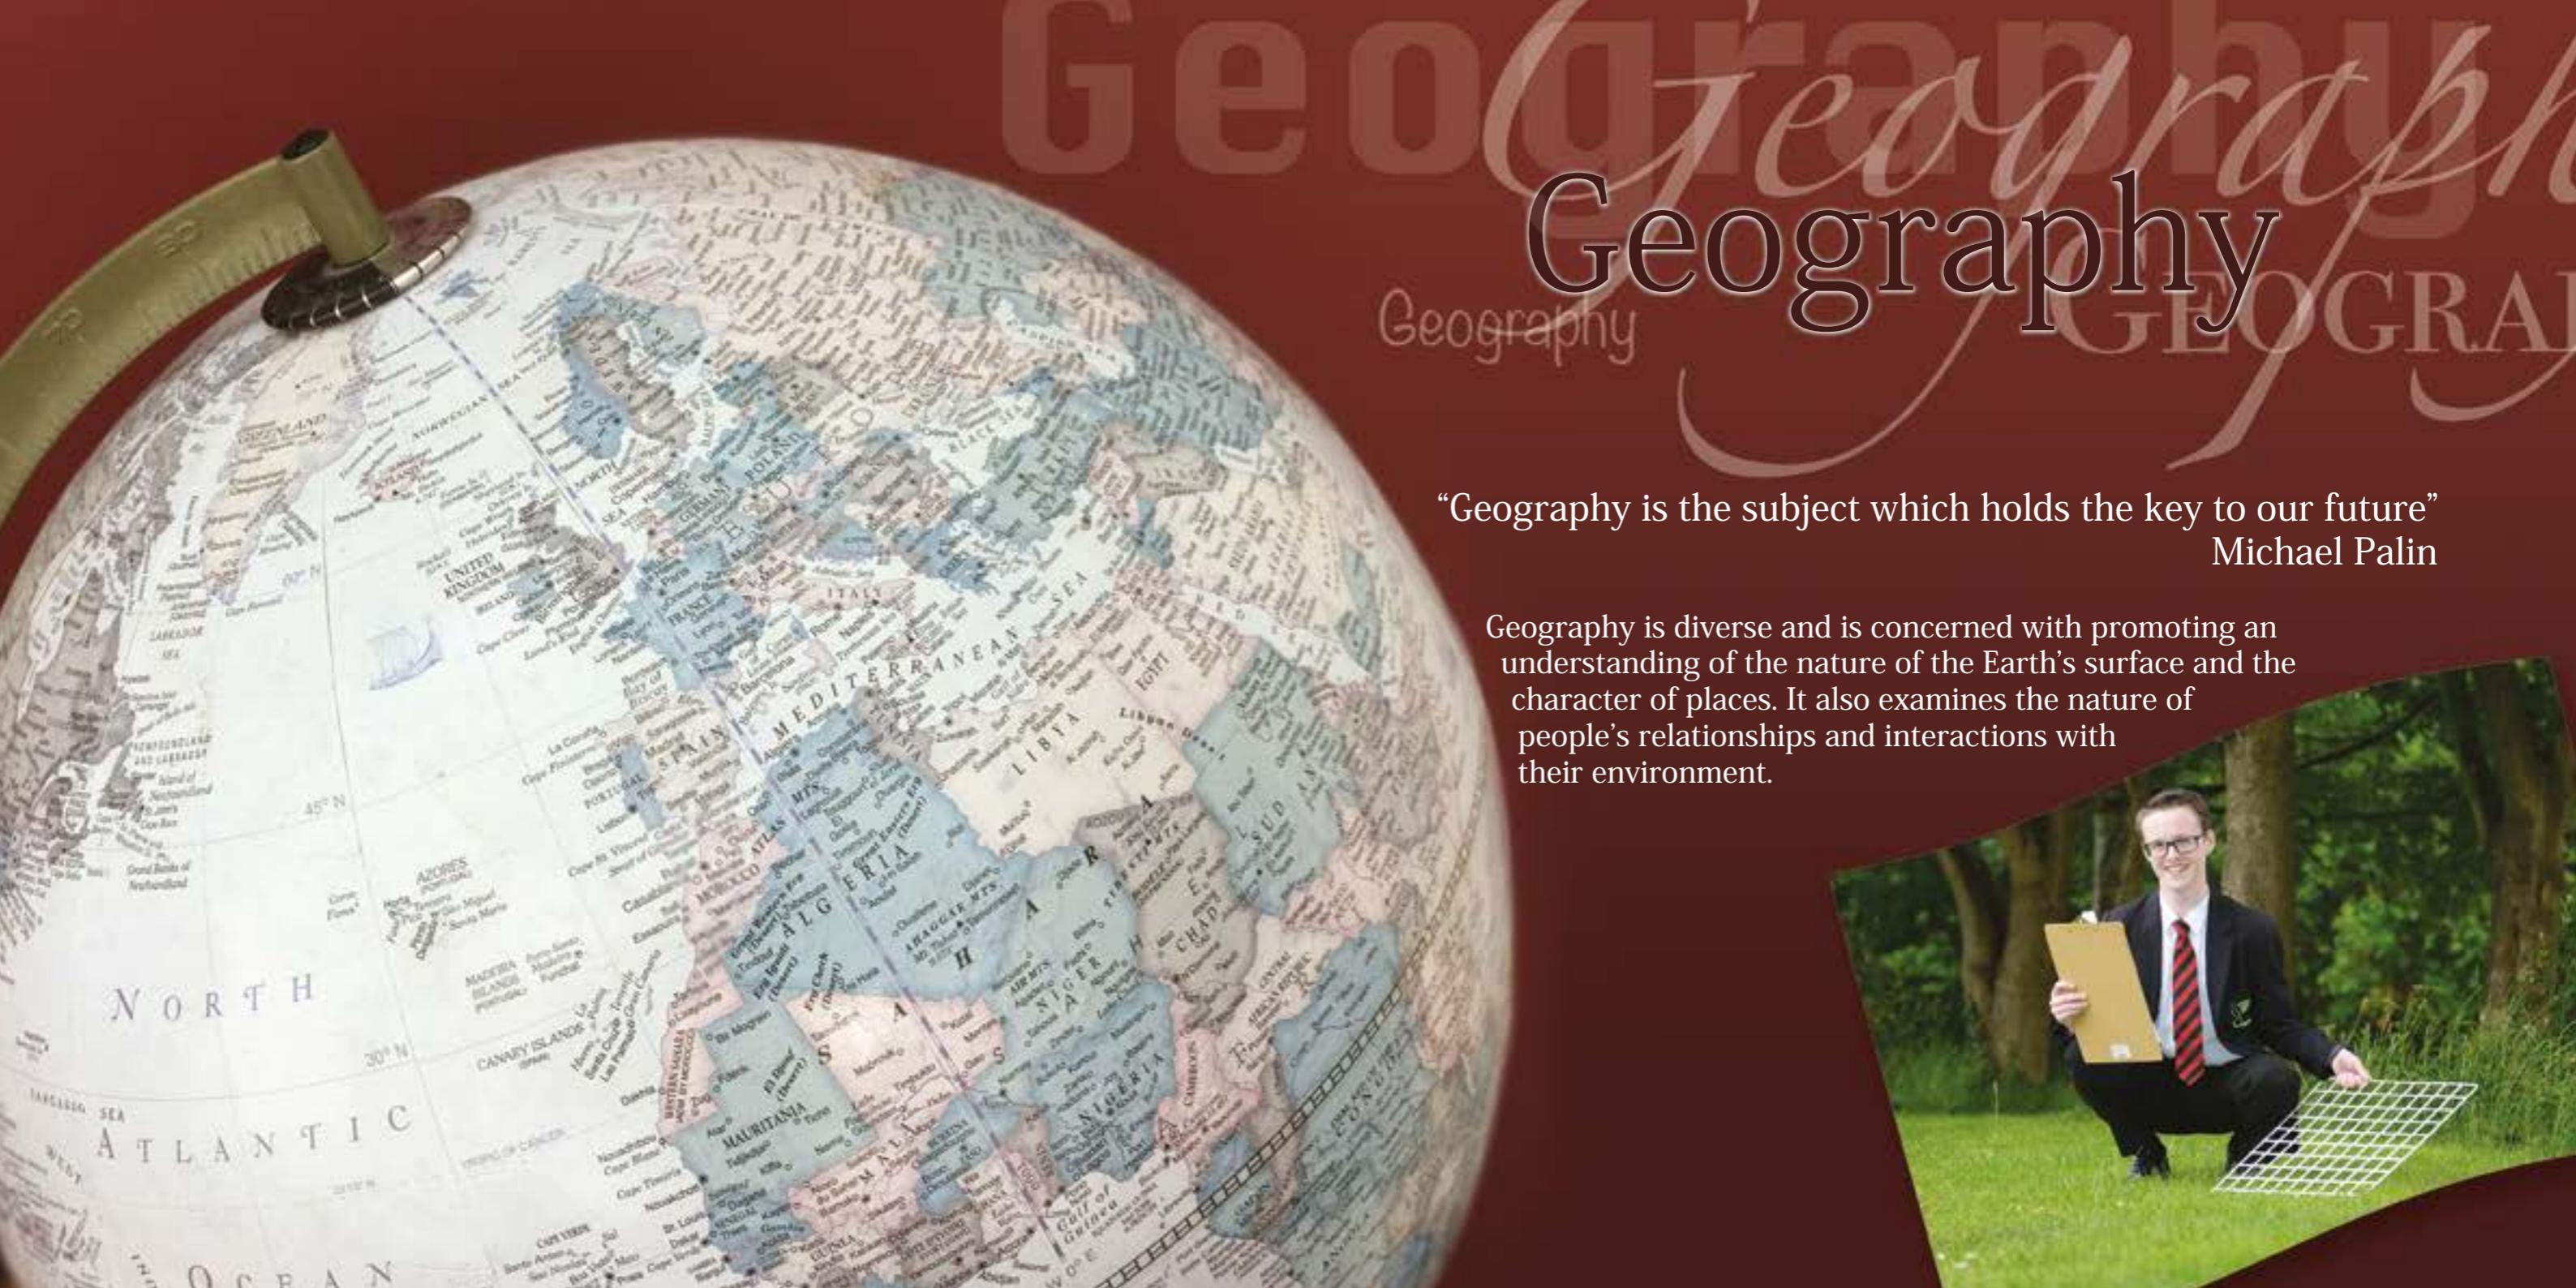

Curriculum

Curriculum

Curriculum

As well as learning on the school site we have an industrial unit, a smallholding and a construction skills centre in another part of Leigh Park. Our smallholding is a unique venture set on a local farm. Some students are following horticulture courses and others learning to care for animals. Currently we have quails, chickens, goats and ducks on our school site, as well as pigs on our smallholding.

These provide opportunities for children to learn outside the classroom and in school groups where they benefit from new experiences. The facilities are run by Park staff. We also organise many trips to widen horizons and develop understanding of this country and abroad. In 2015 students went to Tanzania in Africa, again in July 2017 and July 2019. In 2016 students enjoyed a skiing trip, in 2017, 2018 and 2019 year 11 students went to New York.

“Geography is the subject which holds the key to our future”
Michael Palin

Geography is diverse and is concerned with promoting an understanding of the nature of the Earth's surface and the character of places. It also examines the nature of people's relationships and interactions with their environment.

History

History

History

It is our belief that all pupils should study the past to develop a sense of their own historical identity. Studying the human mindset and experience throughout the ages allows them to make sense of the world around them. It develops critical and enquiring minds that are able to understand different perspectives and challenges the thinking of others.

“History is a lesson in resilience”
Daisy

“History is fascinating! We study the past events to help us not make the same mistakes in the future”
Josie

Creative Curriculum

more than

"What is the importance of history?
The all knowing power in which
we learn about our world.
Our world has been shaped
by the dominant characteristics
of ancestors. The main importance of
history is to gain an authority in
the political world due to how
our history has carved our past.
You could say the importance of
history is what shapes the
future? The past."

more than Testimonies

Testimonies

"I'm really enjoying my English lessons. The atmosphere in my class is good and everyone makes progress. We all know our targets and how we need to improve in order to reach them. As a class we work out strengths and weaknesses and improve together."

"Recently, we finished the Woman in Black. It had some old English and fairly difficult vocabulary, but after analysing quotes and having many discussions we all began to understand the language and the skills of writing."

Wider Curriculum

In addition to academic success we believe students need to become resilient and autonomous. Our personal development programmes include a focus on UNICEF's Rights Respecting School curriculum, Philosophy for Children strategies, Reading Plus, and our own numeracy challenges. We organise a number of cross-curricular days each year to learn work skills and personal development including E-safety, as well as providing broader cultural and social understanding, including British values.

Students have an assembly most days in either their year group, key stage group, or in the cross year Family groups. Assemblies pick up on religious, political, cultural, moral and practical themes.

Our wider curriculum builds towards the new Park Passport as a way to record and credit learning in the greatest range of areas.

School life

PE and Sport

Keeping young people active and learning to play team games is an important part of a rounded education. We have excellent facilities including a full-sized synthetic turf pitch, outdoor multi-gym and indoor fitness suite.

We also have other fun outside activities for young people such as a many-person swing and climbing stones.

Families

We have a house system based around four families: Austen, Dickens, Nelson and Brunel. The Families are led by students and staff who together create a calendar of events and activities and learn about UN rights of the child.

Careers

Careers

Careers

more than

Preparing for life after school is important as each year students have time set aside to think and learn about the world of work. We still provide two weeks work experience for every child in year 10 with the Education Business Partnership. They also help us run interview practice days and CV writing.

Through Hampshire Futures (Careers Service) every child has at least one Careers interview, a time which is set aside for them to talk to an expert about their ambitions and the best courses and apprenticeships schemes.

Students also hear visiting speakers and meet local business people as well as trips to colleges and universities.

School life

Race at Our Place

Park Community School staff and students were once again inspired to take part in our annual Race at our Place and ran 2.5 miles in aid of Cancer Research.

"Most of us know someone who has been touched by cancer and we all have our special reasons for taking part and wanting to help more people survive. Days like this show how the staff and students of Park Community School can pull together to raise awareness and donations for a worthy cause."

more than Religious Education

Who are we? What do we stand for? How should we live?

In RE we offer the chance to explore what it means to be a human being in today's world. We believe that we cannot fully understand ourselves, or our place in the world, without understanding others. The curriculum challenges students to think for themselves; to be critical and reflective thinkers, not just accept what they see and hear.

"RE is about understanding people and accepting them even if they are different from you."

Matthew

"We look at topics relevant to today's society and have to think hard."

Kaitlyn

Performing Arts

The Performing Arts is an exciting hub of creativity, developing self-disciplined and high achieving performers who are ready to enter the next stages of professional training. Sitting alongside our wide range of formal qualifications we offer extensive opportunities for students to participate in cultural experiences, immersing them in the world of the arts.

support
Support
SUPPORT

Gifted, Talented and More Able Students

More able students are challenged and supported to achieve high standards through higher targets, demanding homework, external visits and meeting visitors.

There are regular opportunities to visit and stay at local universities and the universities of Oxford and Cambridge.

Year 11 GCSE Science

"I enjoy all science however I lean towards biology the most because it gives me a practical and visual way of learning. There is always a variety of new and interesting topics to investigate and discover."

more than

more than Support

Student Support

On some occasions children need more support. We have support and guidance staff attached to each year group, as well as medical, counselling and youth specialists. It is very important to us that we do all we can to make sure each child is given every opportunity to enjoy their time at school.

Languages

Languages Languages LANGUAGES

In MFL we are dedicated to providing opportunities for our students at home and abroad. We not only offer an insight into other cultures but support students understanding of their own language and Britishness. Our aim is to open doors to further study and employment and inspire curiosity and tolerance which will create a future generation of well rounded citizens.

more than

Support School Uniform

We believe school uniform is very important and we expect parents to support the school governors' policy on uniform. We also have high standards when it comes to aspects of appearance like hair style and colour, because we believe this helps them prepare for the world of work.

Community School

Park Community is proud of its track record of community involvement. Our buildings are used by many groups in the evenings, holidays and at weekends throughout the year. Students love getting involved and raising money for local and national causes through Family fundraising activities. Our MUNCH programme provides free school meals in the holidays.

"I love performing and being on stage. Dancing at Park Community School has lots of practical work such as "Rock Challenge" which gives me the opportunity to perform, and so allows me to express who I am and what I love to do."

Testimonies

Testimonies

"Binary to me is the most fascinating thing in computer science. Binary to me is order, it's simple however at the same time complex."

Pre-School & Nursery
A Member of the Pre-School Learning Alliance

more than

Pre-School

Pre-School

We have a purpose-built pre-school and nursery called Springwood Pre-School and Nursery on site. Please contact the nursery direct if you are interested in a place.

We continue to identify ways that the younger children can benefit from being on a secondary school site, as well as opportunities for secondary school children to assist within the nursery. We think having young children around the secondary school is important and better reflects home life.

Reading

Reading

Reading

READING

At Park Community School, we are committed to ensuring that no child leaves school unable to read well. This means that they can confidently decode, comprehend and read fluently.

More than that, we will encourage a love of reading and develop students cultural capital through exposure to a wide range of challenging texts.

Maths

We understand that mathematics is about thinking creatively exploring possibilities and coming to coherent, carefully reasoned solutions to intriguing and practical problems.

Mathematics is essential to everyday life and, of course, employment.

Science

Science

In science, we believe in using investigations to promote the learning of key concepts.

We are always questioning and always wondering why and what next.

Expect to be asked many questions.

We are excited to receive a range of answers and listening to different ways to solve a problem.

more than

Apex Centre

Apex Centre

The Apex Centre is near the Leigh Park Shopping Centre about fifteen minutes walk from Park Community School.

Students can undertake construction qualifications which cover bricklaying, plastering, wall papering and carpentry. It is also home to other groups who work in partnership with us in providing unique opportunities and experiences for our students.

more than

Technology

We believe that design, technology, food, catering and horticulture provide problem solvers of the future. A Park Design and Technologist innovates solutions through theoretical and practical application to develop creative products from conception to conclusion. A learner's problem solving ability is vital in employment and further education as well as working collaboratively in a team.

more than

Farm

At our smallholding on a local farm we grow vegetables and rear animals for meat. The vegetables and meat from the farm are used in the school kitchen, not only promoting healthy eating but also allowing students to make the connection between what they eat and where and how it is grown. Younger students are taught horticulture and at Key Stage 4 can take an accredited course.

On the school site we now have Benji and Enrique, two pigmy goats, a brood of chickens, ducks and a bevy of quail. They give the children the opportunity to learn about animal care. For some students a quiet place and a cuddle is welcome.

Park Design & Print

Park Design & Print

In order to give young people real life work experience and education in a real life working environment, we have created three bases away from the main school site.

Park, Design and Print (PDP) is based in an industrial unit and uses digital printing equipment for school resources as well as a wide range of external and commercial customers.

In addition to printing, PDP also produces a range of promotional items, some designed through the enterprise programme that students undertake, helping to raise funds for their school identified charities.

The art and photography department encourages students to express themselves using a variety of media to create works of art of which they are proud. Teachers are passionate, creative experts, students study a range of existing artists and techniques before being inspired to create personal responses which explore their artistic strengths. The department fosters independence and motivates pupils to expand their knowledge by investigating and creating beyond the classroom. See the world in a different way by becoming an artist.

more than

Physical Education

PE

As a department we aim to create an inspirational working environment for both staff and students, where, together, we strive to actively engage students in learning. Participation and achievement is measured, monitored and celebrated.

By the end of their physical education at Park, students should have developed a personal commitment to, and genuine passion for, maintaining their health and well-being into adult life.

more than

Quotes from staff, students and visitors in 2019

"I love Spanish because of all the teacher support and it inspires me to travel in the future. I find Spanish both fun and vital for my future in building up my character/personality as well as allowing me to work in any Spanish speaking country."

"I love seeing how maths relates to things in the real world like games designers using algebra to create games."

"Maths is understanding how the world works, how money is created and used, how buildings are made."

"Park Community School is a special place. Every student is valued and nurtured and encouraged to be the best they can be. A truly happy caring school where success for all is our goal."

"Around school, at the events and in conversation, students are very proud of what they are doing and recognise it is very important."

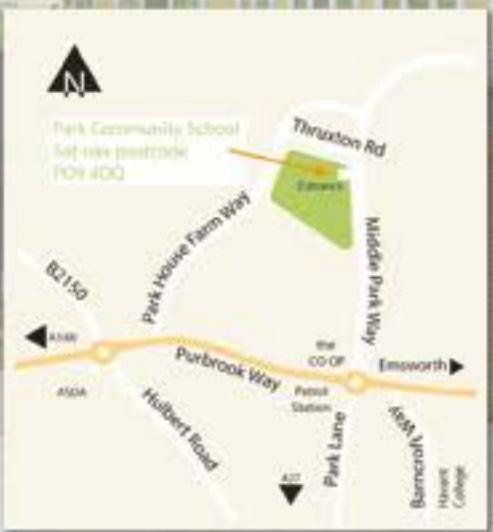

"My attraction to computer science was the idea that the world is ever developing technologically and in the future nearly all careers would require some sort of computational logic."

"I feel we are lucky because we have a variety of musical instruments and resources available to us and these are used to make our music lessons fun, enjoyable and exciting."

"I like everything about PE because the teachers are lovely, challenge us and work us hard. I especially enjoy the athletics and running activities and the opportunities to represent the school at different events."

"Park gives students and their families fantastic facilities and opportunities 365 days of the year. What other school can do that?"
